CAPITAL, - - \$1,000,000

This company acts as permanent trustee, holding estates in trust for lives in being and for any number of years thereafter as designated.

It acts in conjunction with a testator's friend or attorney, under direction to that effect in a will, consulting such persons as to policy while relieving them of detailed management.

It is ready at all times to explain in detail all matters relating to trusteeship in any phase.

LIKE TWO BIG ARMIES

New York Bulls and Bears Have Gone Into Winter Quarters.

Weekly Bank Statement Continues to Grow More Favorable-Indianapolis Grain Shows Declines.

At New York, Saturday, money on call was nominally 3 per cent.

Prime mercantile paper, 71/2 @10 per cent. Sterling exchange was strong, with actual business in bankers' bills at \$4.86 4 @4.86% for demand, and \$4.84@4.84% for sixtyday bills. Commercial bills, \$4.83@4.831/2. Posted rates, \$4.55 2 @4.87 12.

Silver certificates, 73% @750. Bar silver at London, 33%d.

The New York weekly bank statement shows the following changes:

Circulation, increase...... 886,700 The banks now hold \$17,609,951 in excess of the requirements of the 25 per cent. rule.

The bank statement was favorable, the beavy increase of over six and a half millions in deposits being the notable feature. While the small decrease in loans was, perhaps, less than was expected, the addition of nearly nine millions in cash, coupled with the large deposits increase, shows that the money market is improving in condition with entirely satisfactory prompt-

The situation of affairs on the New York Stock Exchange vesterday was like that of two great armies which, after a vigorous campaign, in which neither side gained material advantage, have gone into winter quarters, leaving the picket lines to ex-change occasional shots merely to keep them from freezing. The leading operators on the bull side hold aloof from the market and the big bears do not show themselves at the front. The room traders do what work there is done. Quite a good deal of business was done yesterday in the two hours during which the Exchange was The first prices were made on a deslining market and then was a slight rally. but the improvement did not continue long and until the close the tone was heavy, the last figures being, in the great majority of instances, the lowest of the day, or within &c thereof. The chief declines were Chicago Gas, 1%; Chicago, Burlington & Quincy, %; Rock Island and Consolidated Gas, 34, and Cleveland, Cincinnati, Chicago & St. Louis, 8 per cent. On reports that the proposed reorganization of the Erie railway bonded indebtedness would be prejudicial to the interests of the preferred stock, that issue sold down 6 per cent, and the common fell off 1 per cent. Cordage was also weak on unfavorable reorganization talk, the preferred declining 4 per cent. and the common % per cent.

The railroad bond market was dull, except for Erie second consols, which, for the same reason that the stock was weak, declined 24 per cent. Louisville, Evansville & St. Louis consols fives fell off Among the issues which show an acvance are Chicago, St. Louis & Pittsburg firsts, 4; Rock Island coupon firsts, 24. A story from Philadelphia shat a prominent New York banking house was arranging to ship between one and two millions in gold next week was sifted, and so far as could be learned was a canard, pure and simple. Government bonds were steady. State bonds, nothing doing. Closing quotations

LOCAL GRAIN AND PRODUCE. The Trade of the Week Fairly Satisfactory,

with Few Changes in Values. In most departments trade in the week closing Saturday was fairly satisfactory when conditions are considered, and prices as a rule have carried a firm, steady toue. Coffees are to higher than a week ago, eggs advance ic, provisions continue in strong position and poultry is firm and steady on light receipts. Really choice fruits and vegetables bring good prices. Irish potatoes still have an advancing tendency. while sweet potatoes are lower. Apples are in good demand, out there is a good deal of inferior fruit on the market. Unions are higher. The hide market is more active and firm at the advance of the early part of the

week. The local grain merket was fairly active the past week. Wheat was steady Saturday at Friday's prices, while corn lost be and cate were weaker. Track bids ruled

WHAT TO DO WITH FAIR BUILDINGS Is the Question Which Will Soon Trouble Chicago People.

In lump figures \$19,000,000 went into the construction of the world's fair buildings and the preparation of the grounds for the exposition. The point that now interests the stockholders, and incidentally the whole city and country, is how much can be realized from that \$19,000,000 worth of time and material. It is safe to assume that the time is dead waste. It is safe to say, also, that a large -a frightfully large-proportion of the material will have to go by the board. In the rosy days of promotion it was figured that \$3,000,000 could be realized from the sale of the buildings and the materials. Since then there has been a slump in the expectations, and to-day it is a toss up whether there will be enough salvage to pay for the tearing down of the buildings, the removal of the materials, and the restoration of the park to the condition in which it was before it was turned over to

the exposition company. The South Park commissioners fear that the fair corporation will forfeit its \$100,000 bond and abandon the buildings rather than attempt to tear them down and restore the grounds to their original condition. John C. Fleming, Chicago representative of the Carnegie companies, which furnished about two-thirds of the iron entering into the buildings, says that "a very large part of the iron at Jackson Park will have to go into the scrap pile." That means that it will have to be sold for old iron. There are seven thousand tons of iron in the Manufactures Building, costing about \$70 a ton to put it is place, or nearly \$500,000 in all. There are nearly 30,000 tons in the several buildings, representing a cost of over \$1,500,000. Illustrative of the cost of taking down iron work it may be stated that the architect of Steele Mackaye's skeleton spectatorium estimates that it will cost \$43,000 and every dollar that can be realized from the sale of material to pull down and remove that unsightly monument of yet other blisaful promotion moments. The owners of the Ferris wheel expect to pay \$83,000 to responsible contractors to take down, transport and set up that wonderful piece of work on another site. Emil Phil lipson says it will cost \$100,000 over and above the salvage to tear down and remove the Manufactures Building. Diligent inquiry among wrecking firms and contractors failed to uncover any that would confees having any intention of bidding on the destruction of the White City, or that would admit that they knew of anybody who had a definite purpose in that direc-

No matter who has the work to do there is going to be great trouble and expense in disposing of the waste and rubbish. Where to put it will be a tough problem to solve. It cannot be dumped haphazard into the lake, as much of it would be washed back upon the shore by the action of the water. The authorities would not allow that disposition to be made of it. There will be between ten thausand and twelve thousand carloads of waste material to be hauled away from Jackson Park, according to the calculation of a prominent contractor—that is to say, between 1,500,000 and 2,000,000 enbic yards of rubbish. There will be some thousands of carloads of staff alone to be carted away. There is no hole or swamp to fill up within transportation distance of Jackson Park. A suggestion has been offered that the waste material be used for the erection of an artificial mountain at the southeast corner of the park. In the loose form it will be in when carried from the grounds the waste material will make a pile 1,000 square feet, and between titteen and twenty feet high. The surface area of such a creation would be about twenty-three acres. It was said, while the buildings were being erected, that the iron framework of several of them would be sold to railroad companies, to be used as stations. All the roads running into Chicago have fine stations, and there seems to be no chance to dispose of the iron frames there. The question the officials want answered is, What shall be done with the buildings and the rubbish?

She Grows Flowers.

New York Sun. The name of a California woman is now added to the list of successful feminine borticulturists. This one is Mrs. Henry Barroillaet. She is the widow of a San Francisco banker, who gave up his entire fortune on the failure of his bank. At his death his wife set to work to supply flowers to the San Francisco markets, and she now owns 140 acres of time land, all under cultivation. Seven acres are in orchards, and there is an immense violet bed, twenty acres in extent. There are seven acres of chry eanthemums; roses, lilies and other flowers divide a good many more acres between them. Two thousand encalyptus trees and three thousand pines, sequoiss, and other trees are very profitable, the branches and leaves serving for decorations.

Every day during their respective seasons eight thousand obrysanthemoms, two thousand bunches of violets and eight hundred to one thousand Duchesse De Brabant roses are shipped to the city. Hundreds of other flowers, of course, go with them in fragrant company, but the specialties are violets, at \$2.50 per dozen bunches, and chrysanthemums, at from 1 to 5 cents apiece. Last season there were eighteen thousand chrysanthemum plants in bloom, including 275 of the tinest Japanese varieties. When Mrs. Barroillhet was shipping two thousand banches of violets daily she had only a five-acre bed. Since then she has enlarged it by fifteen acres, so that the number of bunches will be quadrupled. This flower plantation is said to be a perfect Eden. The proprietress personally attends to every detail of arrigation, cultivation, gathering, packing and shipping. Her success demonstrates what a placky and intelligent woman can do when thrown on her own resources.

Speaking of Van Alen.

New York Commercial Advertiser. Of course if a man chooses to be a dude and an Anglomaniac he has a right to be so. but there is the corresponding right in the American people to insist that such men shall not be their representatives. They have the right, too, to laugh at such affectations, but it becomes a far graver matter when it is added to these frivolties that the man has no qualifications for the office and. most of all, that he paid \$50,000 for it, in the shape of a contribution to the campaign fund, for which this office is the reward, knowingly bestowed by Mr. Cleveland as such. These are grave considerations. It the man is an incompetent and a briber besides, and the chief magistrate is a party to the transaction, it is time indeed that the people should know the facts and hold all parties to the strictest account-

ability.

Warning to the "Hello" Ghi. Philadelphia Record. Very few persons, while recognizing the commercial value of the telephone, will dispute the assertion that for a small machine it is espable of provoking more profanity-and of a more vigorous qualityfrom humanity than can any other implement of ten times its dimension. But it was left to a Delaware woman at Dover to discover that the telephone is capable of even greater muschief. In her efforts to carry on a conversation her jaw became paralyzed. The "hello" girl should accept the calamity as an awful warning, and profit by it.

AND WHEAT WENT OFF

Increase in Visible Expected to Reach 14,000,000 Bushels.

Corn Lost Its Early Strength and with Oats Declined--Provisions Given a Boost by Packers.

CHICAGO, Sept. 23 .- Fear of a large increase of visible and smaller exports next week caused the bulls to dump wheat today. The price broke over 10 and closed %c under last night's figures. Corn also was easier, closing with 4 @ kc loss. Provisions were firm and advanced 71/2 @20c.

Wheat at the opening was firmer and

prices 40% o higher, then weakened and prices declined 118@14c, held steady and the closing was easy, about 'se from the the bottom for the day. The firmness early was due to some buying orders coming on the market, but the offerings were quite liberal and soon as the buying commenced a general decline set in. The favorable New York bank statement did not have any effect upon prices. There was a rumor of a failure of some sort at Liverpool, and this made an excuse to uphold the market. It is estimated that the visible supply will show an increase of about 14,000,000 bu. The scattering buying at the start was due somewhat to general oversight temporarily of the fact that Bradstreet's weekly report of exports was made up to Thursday evening, and did not represent the falling off of the last two days of the week.

The receipts of corn were twenty-six cars under the estimate, which may have had some little to do with an appearance of strength, which developed when trading commenced. The opening bullishness of wheat was, however, the more powerful factor, and when wheat began to turn down corn followed suit. Estimated heavy receipts Monday of 860 cars assisted the decline. Prices had a range of 4c. The close was steady, 'so from inside figures. It is denied that Schwartz's short line has been covered.

Oats followed other grain, and in the end closed to lower for May than on the day before. The near futures were compara-

tively firm. It was a packers' market in provisions. After selling considerable January stuff for a day or two, they marked prices up for the Saturday session. The hogs were posted at 109,000 for the week. This was nearly twenty thousand short of the estimate. The estimate for next week was only 110,000. There was no particular stir in the trade. No one cares to sell stuff short, and when a few bids are made prices move up

easily. The offering of vessel room ready to load was light, and the demand only fair. Rates were steady at 15sc for wheat and 14c for corn to Buffalo. Estimated receipts for Monday are: Wheat, 175 cars; corn, 860

GETTING THERE QUIETLY.

More Ways than One of Accomplishing an

Detroit Free Press. "I like a man who gets there quietly." observed the drummer in that peculiar tone which characterizes the preface to a story."

"Well, go on with the rest of it," suggested the man next to nim. "I was just reminded," he said smiling. "by that whistle of how a friend of mine got there quietly. He had a fine old place in the town, where a couple of generations of his family had lived, and with the march of improvement a factory was built on a square back of it, by a wealthy man who had an elegant place in the country, where he lived all the year around, and had many visitore. It so happened my friend owned ten acres adjoining, on which he had a tenant and a barn. As soon as the factory started up my friend discovered that a most discordant and noisy whistle was one of the features, which was blown every morning, at half-past 5 o'clock, to awaken the workmen. It did this very well, but was such a nuisance that an ef fort was made by the old settlers in that neighborhood to stop it. The owner, however, was proud of it, had a pull with the city Council, and the whistle kept on blowing every morning. Then my triend made a personal appeal, but the rich man would not bear of silencing his whistle. What to do next was a question, and my friend settled it quietly. He bought an old second-hand boiler with a cracked and screechy whistle attached, took it out to his farm, put it up within three hundred yards of the factory man's fine house and instructed his tenant what to do. That the tenant did with a will, and every morning at 5:0, when the whistle down town began to blow, the one in the country followed my friend, who hadn't said a word. was waited on by the other whistle owner, and, after much persuasion. he agreed to stop his whistle if the factory man would do the same, and pay for the second-hand boiler and the expense of putting it up. Since that the whistle business is flat in that town, and workmen learn to get up without a whistle, just as people learn to go to church without being reminded of it by ringing the bell on Sunday

PENSIONS FOR VETERANS.

mornings."

THE

INDIANAPOLIS JOURNAL

DAILY.

SUNDAY

AND

WEEKLY

The Journal's price for daily is only 15 cents a week, and it has a very wide circulation, reaching a large number of people hitherto unable to afford the luxury of a first-class daily paper. Reports from agents and subscribers indicate a continued increase, and that what used to be regarded as a luxury has become a necessity. The new readers not only remain, but they are constantly increasing.

It is the purpose of the Journal to make itself even more indispensable to its patrons, new and old, and to still further widen its field. To this end it will not only endeavor to maintain the characteristics which have established its reputation as by far the best newspaper in Indiana, but will add such new features and improvements from time to time as are in accord with journalistic progress and that may tend to the advantage of its readers. It will, for example, give increased attention to State and local interests. What Indianians want is a paper in which Indiana affairs given are especial prominence and importance. This want the Journal has always supplied as no other paper published outside or inside the State is able to do; but the rapidly developing industries and business and social enterprises of the community call for additional consideration and space, With this in view its corps of correspondents has been increased until ithas a representative in nearly every town in the State Special traveling correspondents will visit the news centers of the State at frequent intervals, thus insuring the "write up" of every important event

or matter of general interest. Being published in the geographical center of Indiana the Journal is afforded unusual facilities for securing news promptly, and, what is of greater consequence, is able to reach its subscribers without delay. The ruuning of morning trains from Indianapolis is very favorable to the early distribution of papers sent by mail or express, and in most towns within a radius of a hundred miles Journals are delivered as early as in the city where they are printed. In the more remote counties there is but little loss of time in transportation.

The Journal is the paper for Indianians and particularly for Indiana Republicans. The change of administration involves the settlement of political problems likely to be of the most direct personal concern to every farmer and business man in the State. All such matters will be set forth in detail, the Journal's Washington correspondent being instructed to give especial attention to every hing having a possible bearing on Indiana interests.

But though the Journal is Republican in politics it is non-partisan in the publication of news. Its constanten leavor is to secure facts unbiased by prejudice and to make its columns trustworthy records of each day's happenings. A large editorial force supplements the work of the press associations and the correspondents, and furnishes careful supervision for each department.

The Sunday Journal has a well-established literary character, superior to that of any Western paper. It is not defaced by "plate matter" nor filled with a heterogeneous mass of syndicate literature, but its contributions and miscellany are chosen with a view to their special fitness and adaptability to the tastes of the readers. The reading matter in any given number of the Sunday Journal is equal in quantity and is not inferior in quality to that found in the leading magazines. As an educational adjunct and a source of entertainment the Sunday Journal is indispens-

able in every well-regulated family. The Weekly Journal, at \$1 per year, contains more reading matter than can be obtained for the money in any other shape. It is carefully edited and offers the news of the week in condensed shape and a variety of miscellany, agricultural and household literature that render it one of the best invest ments that any family can make. Try it and see. It has a large circulation in this and other States and agents find it an easy matter to secure large lists of subscribers. Special inducements offered to agents. Circulars sent on appli-
